

Azure-Winged Magpie

Cyanopica cooki

SEASONAL BEHAVIOUR

Remains all year.

DISTRIBUTION

Well distributed, though peters out in the moister, more wooded areas (for example in the higher parts of Sierra de Aracena).

COMMENTS

The Iberian variety, *cooki*, endemic to the Iberian peninsula, is considered by some authorities to be a separate species though most reckon it to be a subspecies.

| H-16 | | | |
| H-17 | | | |

STATUS

Sedentary.

ABUNDANCE

Abundant.

HABITAT

This is the most characteristic Corvid of Mediterranean woodland, preferring patches of scrub with scattered trees though it also occupies dehesas, pinewoods, Cork-Oak woods, mixed woodland and riverside copses, normally in sunny areas. Often strikes up a close relationship with man (in orchards of towns and villages and picnic areas, etc).
