### SEASONAL BEHAVIOUR

Year round presence.

### DISTRIBUTION

Distributed around the whole cordillera, more numerous where rocks abound. Also present in many built-up areas in Seville and Huelva, and in some of Córdoba and Jaén.

### STATUS

Sedentary.

### ABUNDANCE

Common.

### HABITAT

A rock nester on full-scale cliffs and small rocky outcrops in patches of scrub; also takes to man-made alternatives like farmsteads, quarries and mines, dams and even drystone walls; also breeds in some villages and towns.
