

Bullfinch

Pyrrhula pyrrhula

SEASONAL BEHAVIOUR

Most birds are with us from November to March, a few arriving beforehand or leaving later.

DISTRIBUTION

Appears in the four provinces but seems to be more habitual in Sierra de Aracena y Picos de Aroche and in part of the province of Sevilla.

COMMENTS

In Sierra Morena feeds mainly on young shoots of trees and bushes but also on the seeds of *Cistus* species and dry blackberries.

STATUS

Winter visitor and migrant.

ABUNDANCE

Scarce.

HABITAT

Mainly takes to riparian woodland and copses in shady areas but also turns up in other areas like Gum Rockrose scrub, orchards and bramble patches according to the availability of food in each site. There have also been some sightings in pinewoods, Cork-Oak woods and Portuguese-Oak woods.
