

Fieldfare

Turdus pilaris

SEASONAL BEHAVIOUR

May be recorded from October to March, though most records correspond to post-breeding passage (October and November).

DISTRIBUTION

Scattered records throughout all four provinces, even though it is one of the rarest winter visitors to our territory.

STATUS

Migrant and perhaps winter visitor.

ABUNDANCE

Rare and irregular.

HABITAT

Most records come from birds shot by hunters in olive groves, though there are also report of birds near riparian woodland or Ash copses.
