STATUS

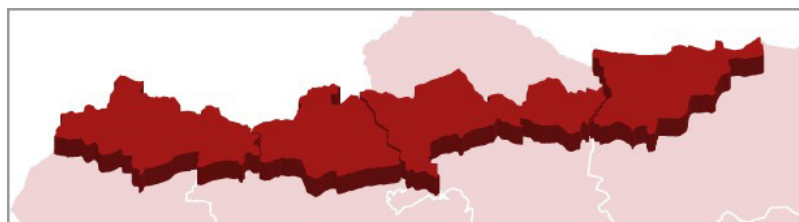

Sedentary.

ABUNDANCE

Abundant.

HABITAT

Occupies diverse types of non-closed-canopy woodland, preferring dehesas of Holm- Oaks and mature Cork-Oak woods with many nesting holes; might also turn up in olive groves, Sweet-Chestnut woods, Pyrenean-Oak woods and, to a lesser extent, pinewoods, olive groves and pastureland. Its name is largely a misnomer, since it actually breeds on rocks fairly rarely, in only a few spots like Cerro del Hierro and Los Órganos.

SEASONAL BEHAVIOUR

Seen all year.

DISTRIBUTION

Well distributed throughout the whole territory.
