

# Rock Thrush

*Monticola saxatilis*

### SEASONAL BEHAVIOUR

Recorded on both spring and autumn passage.

### DISTRIBUTION

Seen very occasionally in all four provinces, favouring Jaén slightly.

### COMMENTS

There is a record of two males singing on the rocky peak of El Puntal (at nearly 1100 masl) in late April 2002, taken to be a breeding attempt; nonetheless there have been no subsequent records in that site or in others with similar habitat, so the species can currently be considered to be a migrant only.

### THREAT CATEGORY

CNEA	CAEA	LRAE	LRVA
-	-	-	VU

### WHERE TO SEE IT

HUELVA	SEVILLA	CÓRDOBA	JAÉN
H-1	SE-1	CO-1	J-1
