

Shoveler

Anas clypeata

SEASONAL BEHAVIOUR

Seen most frequently from October to March.

DISTRIBUTION

Very rare in Huelva, occasionally recorded on Aracena Reservoir. The most regular Seville site is Melonares Reservoir. In Córdoba winters on the Guadalquivir (El Salto), Puente Nuevo Reservoir and sometimes on other wetlands. In Jaén recorded above all on Marmolejo and Yeguas reservoirs, though also turns up on smaller areas of open water.
