

Wood Lark

Lullula arborea

SEASONAL BEHAVIOUR

Year round presence. Its song period is very long, stretching from late summer through to the next spring.

DISTRIBUTION

Evenly distributed throughout the whole area except in the *campiña* of Guadalquivir valley.

COMMENTS

One of the few diurnal birds also fond of singing at night, almost on a par with the Nightingale.

STATUS

Sedentary.

ABUNDANCE

Common.

HABITAT

Pinewoods, *dehesas* and Holm-Oak woods, Mediterranean woodland and, in general, any type of woodland that is not too dense. Sometimes seen feeding in cropland and pastureland without any tree cover or scrub at all.
